Tony Charaf- Delta

Tony Charaf joined Delta in 1996 as director of engine maintenance and moved through the ranks to be named president of Delta tech-ops in 2008.

During his career Tony led more than 10,000 employees and spearheaded the successful creation of Delta’s MRO business, a venture that generated 650 million dollars a year by overhauling engines and airplanes for airlines around the world at Delta’s facilities in Atlanta.

Tony graduated with a bachelor’s degree in engineering and a master’s degree in management from Northrop University. He is active on the governing boards of several nonprofit organizations, and serves on the advisory board of the Goizueta Business School.
